39. Right to Education Brings A Ray of Hope For The Rag-Picker Children

Panchadev Baishya¹

Merina Ahmed²

1. Assistant Professor, Department of Economics, Nabijoti College

2. Librarian, Nabijoti College

INTRODUCTION :

Education is an institution that typically is established through a collective social desire to have civil and supportive societies. And if one considers the social dynamic found in many countries around the world, there is the suggestion that usually the more education people have better off they can be. With this in mind, many societies traditionally view education (at least primary and secondary education) as a genuine public good that adults and educators provide for children until such time that they outgrow their childhood. Many existing international covenant on Economics, social and cultural Rights (ICESCR), and the convention on Rights of the child (CRC), UDHR. These documents have helped to establish viable legal mechanisms from which nation states can and have implemented, supported and assessed effective social structures necessary to provide for appropriate educational opportunities. The goal of a human rights-based approach to education is simple, to ensure every child a quality education that respects and promotes her or his right to dignity and optimum development. Achieving this goal is however, enormously more complex. The right to education is high on the agenda of the international community. It is affirmed in numerous human rights treaties and recognized by governments as pivotal in the pursuit of development and social transformation. This recognition is exemplified in the international goals, strategies and targets that have been set during the past 20 years. In the Millennium Development goals, established in 2000, the world's governments committed to achieving Universal access to free, quality and compulsory primary education by 2015. In 1948, when education was recognized as a human right, only a minority of the world's children had access to any formal education, now a majority of them go to school, and participation in formal education beyond the elementary stages has increased. However, the progress made to date is far from adequate. UNESCO Statistics on enrolment indicate that 77 million children 2004 were still not enrolled in school. According to UNICEF sources this figure may be as high as 90 million children for 2005-2006 in terms of school attendance figures from household surveys. Poverty is a key factor impeding enrolment, primary and secondary completion and learning outcomes and children from ethnic minority and indigenous communities consistently underachieve. The challenges to the achievement of quality in education are even greater. More international attention has been focused on helping children get into

**E-LEARNING IN THE LIBRARY ENVIRONMENT FOR THE COMMUNITY
COLLEGES IN INDIA: A FUTURISTIC STUDY**

Merina Ahmed
Librarian, Nehajyoti College, Assam

Submitted on: 12.05.2015 Revised On: 25.05.2015 Accepted on: 27.05.2015

ABSTRACT:
E-learning is the important learning method in the era of digital revolution. India has given much emphasis in the field of higher education. Community college which is the latest innovation of the intellectuals in the field of higher education has a great shoulder of responsibility to fill the gap between demand and supply of employment industries. E-learning has its different advantages over the traditional learning which can support the community colleges a long mile in today's digital era. This paper gives a brief description about the community colleges along with different prospects of using e-learning for these colleges. It also forwarded certain ideas regarding e-learning in the library environment that can be enacted for these colleges. A brief conceptual idea is also given for e-learning through libraries with Internet, Digital library and content creation portals.

MOOCs with special reference to SWAYAM: A study based on recent development

Merina Ahmed*
Panchalee Baishya**

Abstract

Massive open online courses (MOOCs) are one of the most prominent trends in higher education in recent years. India has started various projects for offering MOOC courses. SWAYAM plays a major role among them. SWAYAM is a programme initiated by Government of India. This paper discusses the different features of SWAYAM platform. The study also differentiates the concept of Swayam and Swayam Prabha. It also presents the different regulations issued from UGC from time to time. It correlates the importance of SWAYAM courses with the UGC system. Further, the study identifies the recent development like ARPIT, National Testing Agency. The study identifies certain challenges and opportunities of using SWAYAM in Indian platform.

Keywords: MOOC, SWAYAM, SWAYAM-PRABHA, National Testing Agency, ARPIT.

Introduction:

Higher education (HE) has been re-engineered with many new developments. Today, the growing use of Computer, mobile and internet users in India have brought the nation into a common platform of digital connectivity. Technology has the power to connect but at the same time it is we who will decide to whom we have to connect and how. One of the major features of digital technology is accessibility of 365 days access to it. Now when we talk about the HE system in terms of technology and learning then

NAAC: THE ANSWER OF BEST PRACTICES IN COLLEGE LIBRARIES

Merina Ahmed

Librarian, Nabajyoti College

Barpeta, Assam

mail id: meriahm543@gmail.com

Abstract:

Education plays a vital role in the development of any nation. Higher education is considered as an important instrument for bringing about social, economic, political and technological progress of any country particularly for a developing country like India. The higher education sector ensures quality of the educational process with the help of accreditation agencies and the libraries are playing a very crucial role in bringing out the vision of Higher Education. Best practices are the vital point where libraries are dealing with to cope up with the changing environment & information needs of the users. This paper will throw light on the guidelines imparted by NAAC to the college Libraries in the purview of best practices. The paper also deals with the different criterion of involvement of libraries in NAAC assessment & areas of libraries where best practices can be adopted. The methodology adopted for the paper is descriptive. The study is important in addition to NAAC guidelines to keep pace with ever changing advancements and needs of users. The objective of the study is to find out the relevance, importance and to identify the different areas of best practices. The paper also highlights the points for impact of NAAC in College Libraries, Role of Library in different criterion of NAAC assessment, Importance of best practices, Guidelines of NAAC in best practices and areas of best practices in Libraries.

Key words: NAAC, Higher Education, Best Practices, College Library
